Section 1.3 Properties of Addition and Multiplication (pages 18 and 19)

- **1.** Sample answer: $\frac{1}{5} + \frac{3}{5} = \frac{3}{5} + \frac{1}{5}$ $\frac{4}{5} = \frac{4}{5}$
- **3.** Sample answer: $(5 \cdot x) \cdot 1 = 5 \cdot (x \cdot 1) = 5x$

5. Comm. Prop. of Mult.

7. Assoc. Prop. of Mult.

9. Add. Prop. of Zero

11. The grouping of the numbers did not change. The statement illustrates the Commutative Property of Addition because the order of the addends changed.

13.
$$(14 + y) + 3 = (y + 14) + 3$$
 Comm. Prop. of Add.

 $= y + (14 + 3)$
 Assoc. Prop. of Add.

 $= y + 17$
 Add 14 and 3.

 15. $7(9w) = (7 \cdot 9)w$
 Assoc. Prop. of Mult.
 17. $(0 + a) + 8 = a + 8$
 Add. Prop. of Zero

 $= 63w$
 Multiply 7 and 9.

 19. $(18.6 \cdot d) \cdot 1 = 18.6 \cdot (d \cdot 1)$
 Assoc. Prop. of Mult.

 $= 18.6d$
 Mult. Prop. of One

 21. $(2.4 + 4n) + 9 = (4n + 2.4) + 9$
 Comm. Prop. of Add.

 $= 4n + (2.4 + 9)$
 Assoc. Prop. of Add.

 $= 4n + 11.4$
 Add 2.4 and 9.

 23. $z \cdot 0 \cdot 12 = (z \cdot 0) \cdot 12$
 Assoc. Prop. of Mult.

 $= 0$
 Mult. Prop. of Zero

 $= 0$
 Mult. Prop. of Zero

 $= 0$
 Mult. Prop. of Zero

 25. a. x represents the cost of a box of cookies.
 b. $120x$

 27. $7 + (x + 5) = x + 12$
 29. $(7 \cdot 2) \cdot y$
 31. $(17 + 6) = 2x$

 33. $w \cdot 16$
 35. 98
 37. 90

 39. 37 is already prime.
 41. 3×7^2
 43. B

The Distributive Property (pages 26 and 27)

- **1.** *Sample answer:* You must distribute or give the number outside the parentheses to the numbers inside the parentheses.
- **3.** $4 + (x \cdot 4)$ does not belong because it doesn't represent the Distributive Property.

Finding the Percent of a Number (pages 172 and 173)

1.	What is 20 multiplied	l by 30?; 600; 6			
3.	12	5. 12.6	7. 7.2	9.	13
11.	21	13. 20.25	15. 24	17.	14
19.	The percent was not $40\% \times 75 = 0.40 \times 75$	written as a decimal or frac $5 = 30$.	tion before multiplying:		
21.	35.2 in.	23. 84	25. 94.5	27.	2.25
29.	4.2	31. =	33. >	35.	48 min
37.	a. 432 in. ² b. 37.	5%			

39. *Sample answer:* Because 30% of *n* is equal to 2 times 15% of *n* and 45% of *n* is equal to 3 times 15% of *n*, you can write 30% of $n = 2 \times 12 = 24$ and 45% of $n = 3 \times 12 = 36$.

41. a. 243 points **b.** 97.2%

43. $1\frac{1}{2}$ **45.** 10

Section 4.5

Percents and Estimation (pages 178 and 179)

1–3. Sample answers are given.

1.	25%			3.	40%		
5.	64% of 37 does not be	elong	g because it is about 24	l, and	d the others are about 8.		
7–29	9. Sample answers ar	e give	en.				
7.	15	9.	4	11.	207	13.	12
15.	45	17.	1	19.	about \$2	21.	a. 150
23.	80	25.	30	27.	180	29.	70
21	comotimos truo: It d	onon	de on how much the n	orco	nt is rounded down com	noro	d to ho

b. 280

- **31.** sometimes true; It depends on how much the percent is rounded down compared to how much the number is rounded up.
- **33.** Sample answer: Northeast: 100 children Midwest: 50 children South: 80 children West: 160 children
- **35.** Your friend's estimate is closer, because $\frac{1}{3} = 0.3\overline{3}$, which is closer to 33% (0.33) than 0.3.
- **37.** $\frac{5}{6}$ **39.** $\frac{2}{7}$

Section 5.1

Ratios (pages 194 and 195)

- **1.** 3 to 7, 3:7
- **3.** Sample answer: Smith: vowels to consonants $=\frac{1}{4}$.
- 5. $\frac{6}{4}$, 6:4, 6 to 4 or $\frac{3}{2}$, 3:2, 3 to 2; There are 3 basketballs for every 2 soccer balls.
- 7. $\frac{3}{7}$, 3:7, 3 to 7; There are 3 shirts for every 7 pants.

9.
$$\frac{3}{4}$$
 11.

13–19. Sample answers are given.

13. $\frac{1}{3}, \frac{2}{6}$ **15.** $\frac{1}{3}, \frac{22}{66}$ **17.** $\frac{18}{20}, \frac{27}{30}$ **19.** $\frac{3}{2}, \frac{6}{4}$

21. The numerator and denominator should be multiplied by the same number; $\frac{2}{3} = \frac{2 \times 2}{3 \times 2} = \frac{4}{6}$

 $\frac{7}{5}$

- **23.** 6 black pieces; The ratio of black to red is 3:5, so the ratio of black to all is 3:8. An equivalent ratio is 6:16.
- **25.** It may be helpful to organize your results in a table.
- **27.** 5 girls **29.** 3.29

3.	105 words 35 min	5.	36 students 16 computers	7.	3 baskets 45 min	9.	\$48 6 tickets
11.	\$7 1 week	13.	<u>45 mi</u> 1 h	15.	140 kilobytes 1 sec	17.	72 mi 1 gal

(pages 200 and 201)

19. 6000 strikes per minute

Section 5.2

- **21.** The 15-pack of energy bars is the better buy because it has a smaller unit rate (\$1.28 per bar) than the 10-pack (\$1.35 per bar).
- 23. equivalent

25. not equivalent

35. B

27. Use Guess, Check, and Revise to find how many more items Homeroom B needs to collect.

Rates

29. 66

31 and 33. Sample answers are given.

2 3	22 4 8
51. $\frac{-}{6}, \frac{-}{9}$	33. $\frac{10}{10}, \frac{10}{20}$

Section 5.3

Solving Rate Problems (pages 206 and 207)

- 1. Distance equals speed times time.
- 3. 105 mi
 5. 276 ft
 7. 5 in./sec

 9. 58 ft/min
 11. 12 m
 13. 7240 ft

 15. \$6
 17. 50 city blocks
 19. 18.6 in./min

 21. Time is given in two different units. Be sure to convert one of them.
 Image: Convert one of them.
- **23.** 86

25. 141

Section 5.4

Mean (pages 214 and 215)

- **1.** No; Dividing the sum of the data by the number of data values to find the mean does not necessarily result in one of the data values.
- **3.** Add the data values then divide by the number of data values.
- 5. The "average" could be 0 if you consider the most common value, or $\frac{8}{7}$ if you consider the mean.
- **7.** 3 brothers and sisters
 9. 16 visits
 11. 3.45 minutes
- **13.** Sample answer: 20, 21, 21, 21, 21, 22, 20, 20.5, 20.5, 21.5, 21.5, 22

Mean (cont.) (pages 214 and 215)

- **15.** 3.9 inches; No, neither team has a height that is much shorter or taller than the other heights. So, you can say that the Tigers are taller than the Dolphins on average.
- **17.** 11 pounds; Use the mean of each collection to work backwards to find the total weight of the collection. Divide the sum of the weights of the two collections by the total number of backpacks (20) to find the mean.
- **19.** 30 **21.** 15.5

Section 5.5

Median, Mode, and Range (pages 220 and 221)

- **1.** *Sample answer:* 1, 2, 3, 4, 5, 6
- 3. The greatest and least data values; The range is the difference of these values.
- 5. 25.4; No, the mode would be better because most of the data values are the mode of 30.
- 7. median: 7; mode: 3; range: 8 9. median: 92.5; mode: 94; range: 28
- **11.** median: 17; mode: 12; range: 31
- **13.** The data was not ordered from least to greatest; The median is 55. 49, 50, 51, 55, 58, 59, 63; The range is 63 49 = 14.
- **15.** singing
- **17.** *Sample answer:* An outlier increases the range of a data set because there is a wider spread between the greatest and least value.
- **19.** mean: 14.9; median: 17.5; modes: 5, 19; range: 28
- **21.** mean: 7.61; median: 7.42; no mode; range: 4.94
- 23. median: 11 years; mode: 12 years; range: 2 years
- **25.** Find the mean, median, and mode with the original values and then again with the new value.
- **27.** Sample answer: 18, 21, 28, 30, 35, 36
- 29. Outlier: 35; With outlier: 62.125; Without outlier: 66

Section 5.6

Analyzing Data Sets (pages 226 and 227)

- 1. The mean is likely to be most affected unless the middle values are far apart, because then the median can be affected more by removing the outlier. The mode is unaffected unless the mode consists of outliers.
- **3.** Sample answer: 190, 190, 190, 190, 192, 192, 195, 195

5.	Number	Tally	Total
	6	Ι	1
	7	II	2
	8	111	3
	9	.III 111L	7
	10	II	2

- **7.** mean: 50; median: 40; mode: 95 *Sample answer:* The mean is probably best, because the mode is the greatest value and the median is too far from the greater values.
- **9.** mean: 110; median: 114.5; mode: 144 *Sample answer:* Either the mean or median is best, because they are both at the middle of the data, while the mode is the greatest value.
- 11. With OutlierWithout Outliermean: 83mean: 69.14median: 69.5median: 67mode: 72mode: 72

The outlier makes the mean greater than most of the data, increases the median slightly, and does not change the mode.

13. With Outlier Without Outlier

mean: 102	mean: 84
median: 85	median: 85
mode: 85	mode: 85

The outlier makes the mean greater than all of the other values, but does not affect the median or mode.

- **15.** *Answer should include, but is not limited to:* Prices of 10 cereals with 1 outlier; unit prices calculated.
 - a. Calculation of mean, median, and mode and explanation of which is best.
 - **b.** Outlier identified; mean, median, and mode calculated; measure most affected described.
- **17. a.** No; The price is the mode, but it is the lowest price. Most cameras cost more.
 - **b.** By advertising the lowest price, they are likely to draw more customers to the store.
 - **c.** Knowing all the measures can help you to know whether the store has many models in your price range.
- **19.** The mean, median, and mode increase by 2, but the range does not change.
- **21.** 5.2 **23.** 55.2

Circles and Circumferences (pages 243-245)

- 1. The radius is one-half the diameter.
- 3. Sample answer: A lawn game has two circular targets with 28-inch diameters. You lost one. You want to use a length of wire to make a replacement.

$$C = \pi d \approx \frac{22}{7} \cdot 28 = 88$$

You need a piece of wire 88 inches long.

- **5.** 14 mm **7.** 12 cm **9.** 1.6 ft
- **11.** about 44 in.

Section 6.1

- 13. about 75.36 m
- **17.** about 31.4 cm; about 62.8 cm

19. about 69.08 m; about 138.16 m

15. about 7.71 ft

21. yes; Because

 $\frac{\text{circumference}}{2\pi r} = \frac{2\pi r}{2\pi r}$ radius $=\frac{2\pi r}{r}$ $= 2\pi$

the ratio is the same for every circle.

- 23. a. small tire: about 127 rotations; large tire: about 38 rotations
 - b. Sample answer: A bicycle with large wheels would allow you to travel farther with each rotation of the pedal.
- **25.** 22 ft 27. 65 in.

Section 6.2

Perimeters of Composite Figures (pages 250 and 251)

- 1. less than and equal to; The perimeter is *less than* when figures making up a composite figure share a common side (dashed line). The perimeter is equal to when the figures making up a composite figure share a common vertex. 3. 19.5 in. **5.** 25.5 in. **7.** 19 in. **9.** 56 m **11.** 30 cm **13.** about 26.85 in. 15. about 36.84 ft Hmmm 17. Remember to subtract the original garden side that you now cover up with the new portion of the flower garden when trying to add 15 feet to the perimeter. **19.** Yes; *Sample answer*: By adding the triangle shown by the dashed line to the L-shaped figure, you reduce the perimeter.
- 21. 279.68

23. 205

Section 6.3

Areas of Circles (pages 258 and 259)

1. Divide the diameter by 2 to get the radius. Then use the formula $A = \pi r^2$ to find the area. **5.** about 314 in.^2

11. about 200.96 in.²

- **3.** about 254.34 mm^2
- **9.** about 2461.76 mm^2
- **15.** about 1.57 ft^2
- 17. What fraction of the circle is the dog's running area?
- **19.** about 9.8125 in.^2 ; The two regions are identical, so find one-half the area of the circle.
- **21.** about 4.56 ft²; Find the area of the shaded regions by subtracting the areas of both unshaded regions from the area of the quarter-circle containing them. The area of each unshaded region can be found by subtracting the area of the smaller shaded region from the semicircle. The area of the smaller shaded region can be found by drawing a square about the region.

Subtract the area of a quarter-circle from the area of the square to find an unshaded area. Then subtract both unshaded areas from the square's area to find the shaded region's area.

23. 53

25. D

Section 6.4

Areas of Composite Figures (pages 264 and 265)

21. 7*w*

- **1.** Sample answer: You could add the areas of an 8-inch \times 4-inch rectangle and a triangle with a base of 6 inches and a height of 6 inches. Also you could add the area of a 2-inch imes 4-inch rectangle to the area of a trapezoid with a height of 6 inches, and base lengths of 4 inches and 10 inches.
- **3.** 28.5 in.² **5.** 25 in.^2 **7.** 25 in.^2 **9.** 132 cm^2
- 11. Answer will include but is not limited to: Tracings of a hand and foot on grid paper, estimates of the areas, and a statement of which is greater. (ilint)
- **13.** 23.5 in.² **15.** 24 m^2
- 17. Each envelope can be broken up into 5 smaller figures to find the ar
- **19.** $y \div 6$

Selected Answers

11. Input Output

13. The first number of each ordered pair should be an input and the second number should be the output that corresponds to the input.

17. Input Output

As each input increases by 3, the output decreases by 10.

21. x + 7 = 15; x = 8**23.** C

- - 15. Input Output

As each input increases by 2, the output increases by 2.

- 19. a. Input Output 1 ▶10 2 ▶18 3 ≻24 4 >28
- **b.** The pattern is that for each input increase of 1, the output increases by \$2 less than the previous increase. For each additional movie you buy, your cost per movie decreases by \$1.
- **Selected Answers**

Section 9.2

Functions as Words and Equations (pages 376 and 377)

3. y = 4x

11. 42

25. 5

- **1.** input variable: *x*; output variable: *y*
- 7. y = 6x
- **15.** 13
- **23.** *a*. *d* = 18*s* **b.** 540 ft
- **27.** The profit is equal to the revenue minus the expenses.

17. no

9. y = x + 11

29. no; Many rectangles have the same perimeter but different areas.

- **5.** y = x 5**13.** 3.5
- 21. yes

Section 9.3

Input-Output Tables (pages 382 and 383)

1. Choose the inputs that represent the situation or show the pattern of the function. Pair each input in the table with its resulting output.

Input, <i>x</i>	1	2	3	4
Output, y	6	7	8	9

7. y = x + 8

3

5. y = x + 3

	Input, <i>x</i>	0	1	2	3
	Output, y	3	4	5	6
9.	$y = \frac{x}{3}$				

11. Each output in the table is one-fourth of the input, but the equation would make each output four times each input; $y = \frac{x}{4}$

7

13.	Input, <i>x</i>	0	2	4	10	16	26
	Output, y	4	5	6	9	1	2

15. *Sample answer:*

GMT, x	6:00	7:00	8:00	9:00	10:00
Eastern Standard Time, <i>y</i>	1:00	2:00	3:00	4:00	5:00

Graphs (pages 390 and 391)

- 1. Make an input-output table. Plot the ordered pairs. Draw a line through the points.
- **3.** Find points on the graph. Make a mapping diagram or input-output table to show the pattern. Use the pattern to write a function rule.

no; The graph is *not* a line.

8

4

21. Pompano Beach; about 100 flights; *Sample answer:* From the graph, Pompano Beach has about 350 flights each day and Gainesville has about 250 flights each day.

3

4 5 6 7 8 9 x

y = 2x + 1; 2 is greater than 1.

23. $\frac{11}{25}$

4 5

678

y = 5x; 5 is greater than $\frac{1}{r}$.

3

25. 0.802

27. C

The Number Line (pages A14 and A15)

- **1.** 8, -9, 22
- **3.** -2 does not belong because the value of each of the other expressions is 2.

- **41.** sometimes; If the number is negative then its absolute value is greater, but if the number is positive then it is equal to its absolute value.
- 43. a. Florida, Louisiana, Arkansas, Tennessee, California

b. California, Louisiana, Florida, Arkansas, Tennessee

45. If x and y are both positive, or if x is negative and y**47.** 11is positive, or if x is 0 and y is positive, then x < y.**47.** 11If x and y are both negative, or if x is positive and
y is negative, or if x is 0 and y is negative, then x > y.**49.** 21

Section B.3

Fractions on the Number Line

(pages A26 and A27)

3. Sample answer: $\frac{1}{2}$ **5.** Sample answer: $-2\frac{1}{4}$ **1.** a **9.** $-\frac{7}{2}$; $-\frac{7}{2}$ is to the right of $-\frac{15}{4}$ 7. $\frac{1}{4}$; Any positive number is greater than any negative number. on a number line **13.** $-1\frac{3}{4}$; $-1\frac{3}{4}$ is to the right of $-1\frac{5}{6}$ **11.** $-3\frac{1}{3}$; $-3\frac{1}{3}$ is to the right of $-3\frac{2}{3}$ on a number line. on a number line. **19.** $-2\frac{3}{10}$ **17.** $-1\frac{3}{6}$ **15.** The larger sand dollar burrowed farther. 21. Write the numbers as decimals, instead of finding a common denominator. **23.** $\frac{1}{4}, \frac{1}{3}, \frac{1}{2}, \frac{2}{3}, \frac{3}{4}, 1\frac{1}{4}, 1\frac{1}{3}, 1\frac{1}{2}, 1\frac{2}{3}, 1\frac{3}{4}, 2\frac{1}{4}, 2\frac{1}{3}, 2\frac{1}{2}, 2\frac{2}{3}$; NEVER ODD OR EVEN **25.** 1.2 **27.** 0.61 29.
